

A close-up photograph of a woman's face, looking slightly to the right. She has light brown eyes, well-defined eyebrows, and pink lipstick. A pink lily flower is positioned near her cheek. The background is a soft, out-of-focus pink and white.

TREATMENT GUIDE

Where Aesthetics Meets Excellence

PROUDLY INTRODUCING

Where **Aesthetics** Meets **Excellence**

At Belmore Facial Clinic, we believe that our patients and their individual needs come first. But in an industry flooded with new products and procedures, we must make sure that health and safety are never compromised. We therefore take a precautionary approach, always opting for safe and tested solutions. Our specialists will do their utmost to get to know their patients, and work with them towards finding the right treatment for every concern they might have.

BELMORE FACIAL CLINIC IS PROUD TO BE AN ACCREDITED MEMBER OF SAVE FACE.

Save Face is a national register of Accredited practitioners who provide non-surgical cosmetic treatments such as anti-wrinkle injections and dermal fillers.

The Register is accredited by Professional Standards Authority and is recognised by the Government, The Department of Health, NHS England and The Care Quality Commission.

If you want to hear more about our Facial Aesthetic Clinic, **contact us today.**

Tel: +44 (0)28 6632 9222 | From ROI: 048 6632 9222

Booking An **Appointment**

Appointments can be made by calling the practice directly on (028) 6632 9222 and speaking to our reception team.

If you would prefer you can also book your appointment online via www.belmoredental.co.uk, or by contacting us via email at info@belmoredental.co.uk.

Your First Visit

Having an aesthetic procedure for the first time can be daunting. That's why, at Belmore Facial Clinic, we believe the consultation is probably the most important part of a patient's journey and should never be under-estimated.

At your consultation, one of our highly skilled medical team will discuss your aesthetic needs and concerns with you and carry out a thorough skin assessment. Your consultation will take place in private, in a very relaxed and informal atmosphere.

Personalised Treatment Plan

We will assess you from every angle to ensure the most natural, harmonious balanced cosmetic results. This then enables us to create a personalised treatment plan that's bespoke to you (with a copy to take home). We'll take you through all the options, recommend the most suitable treatment – or treatment combination – and explain the procedures in full.

What Our Patients can expect from us:

Our ethos is to offer you the highest quality cosmetic treatments and a five-star customer service in a warm, friendly, relaxed environment from advanced aesthetic medical practitioners.

We also have an extensive front of house reception team who will put you quickly at ease and who deliver an exceptional personalised customer service from the moment you pick up the phone through to your treatment.

In return we expect from our patients the following:

Your cooperation in making and keeping appointments. Should it be necessary to change an appointment, we require at least 48 hours' notice. We do make a nominal charge for missed appointments, but it is never our wish to do so.

Anti-Wrinkle Injections

Do you want **more laughter** in your life and **fewer laughter lines**?

Our **expert** facial aesthetic **clinicians** are here to help.

It is often said that our faces are a roadmap to our emotions, and although wonderfully expressive, as time passes our skin and facial muscles lose some of their elasticity resulting in visible lines and wrinkles that can make us look angry. At Belmore Facial Clinic, we use anti-wrinkle injections to create a natural-looking reduction in lines and wrinkles, leaving you with a softer, more youthful and brighter appearance.

Not only can we reduce lines and wrinkles between the eyebrows, around the eyes and across the forehead. We also use anti-wrinkle injections to minimise lines around the mouth, nose, smooth the chin, relax the jawline and neck bands and add life to the eyebrow.

Anti-aging injections are a safe and effective treatment for facial aesthetic concerns, migraines, jaw pain and also excessive sweating. They work by blocking the chemical messages from the nerves which cause the muscle to contract, reducing the appearance of lines, wrinkle, jaw pain and stop messages moving between the nerve endings and the sweat glands.

The best time to start this treatment is when you start to notice lines or wrinkles on your face at rest. Deep wrinkles are a little more difficult to remove and so we recommend starting this treatment before they become too deep.

Our team of expert injectors are registered with SaveFace and we only use injectables from the world's leading suppliers meaning that you can be sure you're in safe hands.

Dermal Fillers

The **Instant** Way to **Erase** Tell-Tale **Lines & Wrinkles** and to **Restore** Volume & **Youthfulness**.

As we get older, our body functions slow down, and the skin loses its ability to make Hyaluronic Acid. Resulting in a loss of natural elasticity and youthful volume especially from the face and neck.

Dermal Fillers, which are made from hyaluronic acid, boost the skin's natural hydration and restore volume, therefore, delaying the signs of aging, making dermal fillers an excellent choice for anyone hoping to 'turn back the hands of time'.

One of the reasons why dermal fillers are such an incredible treatment is due to their versatile nature. They have so many different applications, from adding filler to cheeks to improve the look of the whole face, sculpting the jawline, restoring lost volume to lips and even the 'non-surgical nose job' in which filler is added to the nose to improve the look of bumps, misalignment and a downturned tip.

FAT Dissolving INJECTIONS

We all have **areas** of **stubborn fat** that we struggle to get rid of.

For some of us, no matter how much we diet or exercise, we simply can't get rid of certain pockets of fat. For many people, fat deposits are actually genetic too – meaning you will always have those pockets of fat – unless you remove them with a procedure like this. If those fatty deposits knock your confidence on a daily basis, and you find yourself feeling self-conscious because of them, maybe it's time for a change? Why not take a step toward the body you want and the shape you want, and opt for fat dissolving injections? These injections can help you contour your body, and fill you with much needed body confidence.

What are **fat dissolving injections**?

Fat dissolving injections entered the UK market like a storm. It is an EU-approved, revolutionary product that helps to dissolve local fat. It may remove unflattering and stubborn areas of fat without the need for liposuction or surgery. They work by hydrolysing the wall of the fat cells and therefore making it release its lipid content within. This then breaks down the fat cells and lets them be removed from the body via natural processes.

Fat dissolving injections are a flexible treatment and can be used almost anywhere in the body and is particularly popular in reducing the fatty deposits such as upper arms, double chins and muffin tops.

Popular areas for Injection Lipolysis:

- Double chin
- Chest fat (in men)
- Jowls
- Upper arms
- Lower abdomen
- Inner thighs
- Buffalo humps
- Muffin top hips
- Knees

Why choose **Fat Dissolving Injections**?

Instead of surgery or invasive treatments, which can require weeks off work and are also painful procedures, fat dissolving is a treatment that can be done with minimal downtime and minimum time investment. Despite the short treatment time, it delivers powerful and impactful results for patients and you'll see the fat deposits lessening over weeks after the treatment. For people who want fat loss focussed on a specific area, or need help 'contouring' their shape – Fat Dissolving Injections are a fantastic choice.

At **Belmore Facial Clinic** we use a variety of Pluryal products that have been scientifically proven for fat dissolving:

FACECONTOUR
(for dissolving fat on the face)

BODYCONTOUR
(for dissolving fat on the body)

BODYFIRM
(for firming up the tissues after treatment).

Skin Firming Treatment with **Pluryal BODYFIRM®**

This is a skin tightening procedure that involves using a dermal roller to apply the product. The benefit of using a dermal roller or needles alongside this treatment is that it increases the benefits that the topical product has as it's able to penetrate deeper in the dermis. This treatment is often paired with fat dissolving treatments, to maximise aesthetic results and prevent 'sagging' skin after fat loss.

Highlights of this treatment:

- Stimulates natural lymphatic drainage
- Increases elasticity/reduces "sagging" skin
- No pain, no downtime
- Effectively reduces cellulite
- Firms the skin

Results for this treatment are noticeable from the first session, but will continue to become more apparent with every treatment.

Skin Booster Treatment – Redensity 1

Reveal your skin's radiance with the newest concept in aesthetic medicine – Redensity 1 Skin Booster Treatments

As we age, cells start to reproduce more slowly and produce less collagen and elastin. So inevitably, skin becomes thinner, losing elasticity and luminosity, while wrinkles deepen, complexion dulls, and your skin becomes uneven.

The exclusive formula of Teosyal Redensity I, redensifies your skin, bringing back its ability to reflect light and supplying an immediate, cumulative, visible, and – most importantly – natural result!

This award-winning product which is composed of ingredients naturally found in the skin will act as an overall skin enhancer and revitalizer and is used to improve several characteristics of our skin that are negatively impacted by age such as wrinkles, sagging, loss of hydration, loss of elasticity and so on.

Skin Booster treatments with Redensity 1 include many benefits, such as;

- Nourishment and hydration of the skin
- Improved skin texture
- Promotion of radiance
- An overall refreshed look
- Restored plumpness
- Tone and firmness
- Improved complexion

This procedure is a **great** choice for the **face, neck, décolleté, and hands** – especially areas which have been traditionally hard to correct, such as **smokers' lines** and the lines which develop around the **eyes**.

It has often been tricky to achieve natural looking results on these areas with traditional filler as it can leave you looking puffy, Redensity 1 differs in that it is extremely light and is injected with a very fine needle, producing beautiful, soft, natural results.

This procedure is suitable for anyone who has noticed the following signs of aging begin to appear and develop: tired, drawn features, loss of tone and radiance, wrinkles, and lines. It is both corrective AND preventative!

PRGF Mesotherapy

Completely **natural** facial **rejuvenation** that only you can give yourself.

PRGF-Endoret facial rejuvenation treatments are one of the world's best-documented procedures, with over 20 years of clinical data and supported by more than 70 scientific papers.

This treatment works by extracting the growth factors and stem cells from your own plasma which we use in an all-natural mesotherapy treatment to push back the hand of time on your skin aging clock.

PRGF can be applied to the face, neck and/or hands skin using a fine needle in a short pain-free session. The injected plasma contains proteins which have a biological activity, and this stimulates tissue regeneration, increase in the skin's thickness, smoothness, and luminosity, turning back the effects of the aging process.

Some of the incredible benefits associated with this treatment include:

- Improved skin consistency
- Wrinkle reduction
- Brighter complexion
- Rejuvenation and renewal of the skin
- Increased collagen production
- Naturally slowing down the aging process.
- Increased skin hydration and skin cooling feeling

The ideal age for treatment depends on the results you are looking for, it can be used as a preventative treatment to slow down the aging process, or from approximately 45 with regenerative and corrective purposes. It is recommended to do three sessions in the first three months. Subsequently, the process is personalized, with between 1 to 3 annual session. Follow-ups will depend on age and skin types.

Threadlift Facelift

The most **discreet** facelift ever. So **quick** you can nip out and do it on your lunch break.

The thread lift facelift is a non-surgical minimally invasive procedure which can tighten loose saggy skin on the face, jowls, and neck. As we age, we lose collagen and elastin from our skin which leads to looser facial tones and the appearance of fine lines and creases. Combine this with a natural loss of fat in the face, hollows in the upper cheeks start to appear which create heaviness above the jawline and around the chin giving a tired and aged look.

Unlike traditional surgical facelifts, the thread lift does not involve incisions, operating theatres or weeks of recovery. The procedure is performed under a simple local anesthetic, takes no more than 30 minutes, and you will be able to walk out and return home or go back to work a short time later. The amazing threadlift facelift can improve the appearance of sagging cheeks, deep lines, wrinkles, jowls, loss of facial volume, forehead wrinkles and even offer jawline redefinition.

A surgical facelift will always be the gold standard for those wishing to redefine the jawline or eradicate the signs of aging from the face and neck. But for those seeking a less expensive option and can accept a less dramatic result that a facelift then the thread lift is the option for you. Giving instant long-lasting results, minimal downtime and the threads also stimulate the production of collagen helping to restore firmness.

A thread lift procedure is very versatile and practically all areas of the face to be treated, including the:

- Neck
- Undereye area
- Jowls
- Eyebrows
- Crow's feet
- Jaw Line
- Cheeks
- Nasolabial folds
- Mouth

Thread Lifting is a non-surgical face-lifting treatment, suitable for anyone wanting to improve the appearance of the skin such as;

- Laxity and moderate sagging of the skin in and around the eyes, eyebrows, neck, jowls, and cheeks.
- Anyone wishing to see instant results and are unable to tolerate an extended downtime such as with a surgical facelift.

Opatra Reveal Skin Analysis Scan

Analysis Scan offers us the ability to accurately measure up to 2mm underneath your skin and detects levels of sun damage, pores, scars, skin texture, and wrinkles.

This digital skin analysis will allow our qualified skin specialist to effectively target these areas and tailor a unique treatment plan for your skincare needs.

At your initial consultation, our skin specialist will take a photograph of underneath your skin, which will identify areas of pigmentation, sun damage, wrinkles and other areas that are not apparent to the naked eye. The scan can also detect these areas before they have the opportunity to surface. Our skin specialists will then advise you on the best treatments targeted for these specific areas.

The Facial Analysis is completely safe and pain-free procedure and is suitable for everyone.

The Opatra Reveal Skin Analyser uses a 2000W high-resolution digital camera with 3 spectrum imaging to analyse 10 facial problems including acne, UV damage, and wrinkles; producing detailed images and reports.

Areas the scan will analyse:

Wrinkles: Detects Fine and deep lines within your skin, reveals emerging lines developed by the skin laxity which changes as we age.

Pigmentation: Brown spots and melanin distribution are evidence of sun damage, aging, and blemishes. By identifying these areas along with a spot count measurement we can provide you with a definitive approach to correcting any pigmentation concerns you have.

Pores: Identifying key regions of Enlarged pores or blackheads and measuring your skins tone and texture using a smoothness score.

Redness: Vascular conditions sensitive/reactive skin are just some of the multiple causes of your skins increasing levels of redness, treating redness can be challenging but by measuring the overall levels of redness the Janus II allows us to target these areas effectively providing you with optimal treatment results.

Acne: Measures the key parameters that cause acne- Sebum (oil measures) whiteheads, pimples, scars, colouring of scars. By identifying these regions, we can then tailor treatments for these affected areas.

Complexion: The Scan will reveal your true complexion detecting areas of hyperpigmentation, heightened redness, broken capillaries, hydration, age spots, and blemishes.

Chemical Peels Overview

The name **chemical peel** can strike fear into the hearts of most people, but there is no need. In today's modern world chemical peels are no longer the thing of nightmares.

Chemical peels are simply a way of exfoliating the skin. Removing dead skin cells by using acids to loosen the bonds between cells and dissolve dead skin cells away. Unlike everyday facial scrubs, chemical peel ingredients sink into the skin, targeting deeper layers.

The truth is chemical peels are hugely underrated and sadly lacking from most skincare regimes. Given recent technological advances and enhanced formulations, new generation chemical peels are getting better and better and growing in demand.

Facial peels can be used to help with many skin care concerns including;

- Rejuvenation of the skin on the face, neck, hands, forearms, and chest
- Reducing acne scarring
- Reversing skin damage
- Reduction of the appearance of fine lines and wrinkles
- Removing hyper-pigmentation, liver spots and other signs of aging.

Common ingredient found in chemical peels include fruit sourced acids such as Alpha Hydroxy Acids (AHA) and Beta Hydroxy Acids (BHA).

AHAs the milder of the two are naturally occurring such as glycolic or lactic acid. These are an excellent choice for dry skin as they exfoliate the skin while improving hydration.

BHAs are much stronger, and are acids such as salicylic acid. They sink deeper into the skin and exfoliate while also cleaning the pore walls. BHAs are more useful for oily, problem skin.

We offer several different chemical peel options which specifically address a variety of concerns. Our expert clinicians will be able to advise you on the best chemical peel for your skin care needs.

- Acne and oil control treatments to minimise oil production, large pores, and inflammation
- Ultra-hydration treatments to hydrate and rejuvenate moisture-depleted skin
- Skin brightening treatments to restore skin clarity

Belmore Facial Clinic are delighted to now offer Professional Medical Grade Products and treatment from AlumierMD

"AlumierMD was developed by a global team of scientists, dermatologists and leading industry professionals. Through advanced propriety chemistry, AlumierMD has optimised the bioavailability of each molecule in our ingredients we use. As a result, our scientific formulations deliver exceptional results. AlumierMD was born out of an understanding that everyone wants clear beautiful skin. We assembled a team of top scientists and physicians to bring you the most effective formulations using optimal medical-grade ingredients.

With over 100 years of combined skin care experience, our experts understand the physiology behind different skin types and conditions to help your clients achieve a youthful glow.

Because we focus on the science behind great skin, we know that it starts with identifying and understanding every skin profile. Our comprehensive medical skin care line includes start of the art science-based, luxurious formulations with innovative delivery systems. These products address multiple skin concerns, delivery results and perform progressively over time."

Chemical Peels

A **chemical peel** is a **treatment** used to **improve skin texture and tone**.

An acid is applied to the skin to lower the pH, which loosens the connections between dead skin cells, including exfoliation and stimulating new cell growth. This process causes superficial layers of dead skin to peel off, revealing a smoother and more radiant complexion.

Chemical peels have been used dating back to Ancient Egypt, according to some sources, Cleopatra used sour milk to improve the appearance of her skin.

Chemical Peel Treatment Expectations

Beautiful skin doesn't happen overnight, and treatments take time to show results. A single chemical peel can provide the immediate effect of bright and radiant skin; however, more significant results in treating textural issues, fine lines and inflamed acne could take up to eight weeks. Using homecare products consistently and as directed to achieve optimal results. Just as you take time to exercise, you need to take time for your "daily skin care workout regime".

AlumierMDs Chemical Peel Philosophy

AlumierMD offers light to medium **depth peels** known for their **excellent results** and **safety profile**.

We believe in repeated treatments for progressive and gradual results to avoid side effects and downtime associated with deeper peels. AlumierMD peels are only performed by trained skin care professionals in a clinical setting to ensure that they are delivered safely and effectively.

Chemical peels work by deeply exfoliating the surface layers of the skin, forcing your body to quickly replenish it with new cells. When peels are performed regularly, the skin gets used to this process and begins to rejuvenate itself like younger skin. To be sure that the body doesn't react to this exfoliation as it would to trauma, which can lead to pigment changes, exfoliation must be introduced gradually giving the skin time to adjust.

Pre-treatment products precondition the skin, accelerate results and minimise complication. Post treatment products minimise complications, heal and soothe the skin and then maintain the results. Professional treatments enhance the results of home care products

AlumierMD Professional Chemical Peels

AlumierMD **Peel Treatments** are the next generation of **clinical exfoliation**. With a variety of peels, each with a **unique** complex of **ingredients**, our AlumierMD skincare professionals can customise your program of treatments to **target** your specific **skin concerns** whether it be aging, pigmentation or acne.

This unique experience includes an exfoliating peel treatment, brightening enhancement followed by prescriptive targets serums with reveal a more radiant, soft and luminous skin.

Glow Peel

(Dry, Normal, Oily, Dehydrated, Acne, Hyperpigmentation & Ageing)

Glow Peel combines lactic acid, salicylic acid and resorcinol, creating a multipurpose resurfacing solution effective in minimizing the appearance of fine lines, wrinkles and hyperpigmentation issues like age spots, discolouration and uneven skin tone. This formula exfoliates dead skin cells and stimulates cell renewal. To suit individual needs, Glow Peel can be customized by strength by numbers of layers.

Vitamin A Boost

(Acne, hyperpigmentation & Ageing)

Vitamin A boost is a potent and pure retinal and lactic acid resurfacing treatment. It reduces the appearance of fine lines, wrinkles and hyperpigmentation by boosting collagen production and speeding cell turnover, creating a more radiant and even-toned complexion. Ideal for mature or sun damaged skin.

Detox Clear

(Acne, Congestion)

Detox Clear contains salicylic acid and lactic acid for excellent pore penetration and exfoliation. Salicylic acid penetrates into the pore and exfoliates dead skin cells and excess sebum. Lactic acid exfoliates dead skin cells and hydrates. Eucalyptus provides strong astringent properties. Together, they work to smooth skin, minimise pore size experience, reduce acne and prevent new pimples from forming.

Radiant 20/10

(Acne, hyperpigmentation, uneven skin tone, congestion, open pores & oiliness)

With lactic and salicylic acid, radiant 20/10 resurfacing peel contains a powerful combination of them both which improves skin tone and texture by exfoliating dead skin cells and speeding cell turnover. The multipurpose resurfacing peel reduces acne pimples and minimizes the appearance of fine lines and wrinkles, large pores, hyperpigmentation and sun damage.

Radiant 30

(Hyperpigmentation, Uneven Skin tone, dull skin, line & wrinkles)

Radiant 30 is an alpha hydroxy acid resurfacing peel containing lactic acid to exfoliate dead skin cells. Boost cell turnover and stimulate collagen, improving skin texture and tone. This multifunctional peel targets multiple skin conditions, including fine lines and wrinkles, discoloration, sun damage and large pores.

AlumierMD Luxury Facials

AlumierMD Professional Treatment

Deep Moisturising Treatment is an intensely hydrating and nourishing option that infuses antioxidants and moisture binding ingredients resulting in plump, soft skin and a dewy complexion. This customised treatment also includes the application of targeted treatment serums to address your individual skin concerns in order to provide the optimal result.
